AscentFocus™

ASCENT

Automated regulatory mapping creates a tailored digital inventory of your company's regulatory obligations.

- ⊘ **Quickly identify your regulatory obligations.**
- ⊘ **Establish a centralized obligations inventory.**
- ⊘ **Receive alerts on rule changes as they occur.**

Automate Your Regulatory Mapping Process

AscentFocus™ is the cutting-edge regulatory mapping solution that creates an accurate, tailored digital inventory of your company's regulatory obligations.

AscentFocus eliminates cumbersome spreadsheets and manual processes while empowering your risk and compliance teams to identify and manage the specific regulatory requirements that impact your company. With AscentFocus, you'll have the power to ignore irrelevant regulatory noise and focus only on regulatory updates that impact your business.

What you can expect with AscentFocus

Efficiently and accurately identify and manage your regulatory obligations.

Provide a single source of regulatory truth for all your teams.

Enable efficient, effective change management with automated tools and intelligence.

Ensure audit readiness with traceability from each policy back to the original rule.

Streamline risk identification and prioritize areas that require immediate attention.

Ensure more effective policy and control management.

Establish a centralized obligations inventory

AscentFocus creates a tailored digital inventory of your company's regulatory obligations, where you can monitor in real time the relevant rule changes and have confidence that you understand your precise regulatory requirements.

Your obligations inventory updates automatically as regulations change and delivers a side-by-side redline comparison of the new and former versions of a rule, with supporting documentation. Daily alerts and automated tools enable your teams to analyze regulatory changes in real time, to empower your organization with an up-to-date picture of the regulations that apply to your company today.

Benefits of your AscentFocus obligations inventory

- Streamlines compliance management and drives efficiencies by automating manual, labor-intensive work.

- Provides a centralized, accurate source of regulatory truth for your company.

- Empowers your organization to track, monitor, and manage compliance activities more efficiently.

- Ensures that risk management efforts are focused on relevant and critical areas.

- Strategically aligns horizon scanning and GRC tools with your compliance and risk management goals.

- Enables your organization to plan and allocate resources more effectively.

Power relevant horizon scanning results

AscentFocus is seamlessly integrated with the AscentHorizon™ horizon scanning tool to produce search results based on your specific regulatory requirements. This linkage enables AscentHorizon to deliver all the contextual information that you need to comply with each element of your obligations inventory. In addition, any changes to your obligations inventory feeds automatically into your horizon scanning results, enhancing the effectiveness of risk assessments, compliance monitoring, and decision-making.

The integration of your obligations inventory with horizon scanning provides a targeted view of the regulatory lifecycle, to strengthen risk mitigation, enable business leaders to act strategically, and minimize the long-term cost of regulatory compliance.

Ensure effective, efficient change management

Automated change management tools give you a head start in evaluating the impact of relevant regulatory changes. For every rule change, you get a side-by-side comparison of the current and previous versions of relevant rule changes. This enables your team to quickly evaluate the impact of a change and pass along relevant changes for further review or action.

Digitized linkage to compliance policies

Your AscentFocus obligations inventory is integrated seamlessly with leading GRC platforms, to align your requirements automatically with internal policies, procedures, and controls. As regulations are amended, AscentFocus automatically updates obligations and alerts GRC platform users to assess the impact of new rules and implement required actions – to help drive more effective policy and controls management.

Your obligations inventory, not only help your team improve risk mitigation and compliance management, but also sets the stage for seamless integration with your GRC tool to drive strategic decision-making and long-term success.

Establish a defensible compliance posture

AscentFocus documents a real-time audit trail of regulatory compliance activities ensuring audit readiness with traceability from each policy back to the original rule. This audit trail serves as a robust and transparent record, offering granular insights into your adherence to regulations.

With AscentFocus, you can confidently present tangible evidence of your commitment to compliance and be prepared for internal assessments. You'll also minimize risk as you respond effectively to external audits and exams conducted by regulators.
